In order to achieve a single standard for linguistics publications in Taiwan, the same style sheet of *Language and Linguistics*, another linguistics journal in Taiwan, is adopted. Please note the following conventions:

1. Start the sections from 1 and order subsections as follows:
   1.
   1.1
   1.1.1
2. Number examples as follows:
   (1)
   (2) a.
   b.
   Examples should be numbered consecutively throughout the whole paper.
   Use straight quote to indicate prime, e.g. a'.
3. Use footnotes, not endnotes. Use an asterisk at the end of the title to refer to a footnote of acknowledgments. Numbers of other footnotes, starting from 1, should also run consecutively throughout the whole paper.
4. The font used is Times New Roman. Use italic or bold for emphasis.
5. Use the following citation formats: Smith (1991), Smith (1991:234 ), (Smith 1991), (Smith 1991:234).
6. Examples of references (note the use of punctuation marks within references):
